Introduction:

During the 2020-2021 school year, the Student Academic and Family Enrichment (SAFE) program implemented the third year of a five-year grant project funded by Nita M. Lowey 21st Century Community Learning Centers (21st CCLC) grant program at Manse Elementary School in Pahrump, Nevada. The Nita M. Lowey grant program is a federally funded project dedicated to supporting local after-school, before-school, and summer learning projects. Recipients of the grant are local schools that serve students who attend high-poverty, low-performing schools. The Manse SAFE Program provides:

- Academic development activities that help students meet state and local achievement standards.
- Enrichment services designed to reinforce the regular academic program, such as reading, writing, dance, theater play, physical activities, art, music, nutrition, and STEM education programs
- Education for parents so that they can support their child's academic development at home.

Reference: www.afterschoolalliance.org/policy21stcclc.cfm

The NyE Communities Coalition (NyECC) facilitated the Manse SAFE program, which secured the 21st Century grant that funds this project. The program Director is Mr. Jeff Hammar.

As part of the program requirements, each grant recipient must conduct a program evaluation. The evaluation process aims to assist participating grantees in creating a system to review program implementation and students' academic performance while using the information gathered to make program improvements. This document represents the program evaluation for the Manse Elementary School SAFE program for the 2020-2021 school year.

Developing the Evaluation:

During the 2020-2021 school year, the Nevada Department of Education required the 21st Century After School Grant recipients to hire an external evaluator to coordinate with the grantee to complete a program evaluation. The first step in this process was establishing an evaluation team and developing an evaluation plan that addressed project implementation and performance outcomes. NyECC supported four site-level programs, including Floyd, Hafen, J.G. Johnson, and Manse Elementary Schools. To complete the evaluation Mr. Jeff Hammar the SAFE program Director, pulled together a team that included the NyECC Data Technician, external evaluator, site coordinator, assistant site coordinator, and a teacher representative for each school site. The team followed Nevada Department of Education (NDE) Guidelines when completing the 21st Century After School program evaluation.

The process began with Dr. Pradere (external evaluator) and Mr. Hammar facilitating multiple planning meetings with the program evaluation team. This team included representatives from each of the participating schools. The schools include Floyd, Hafen, J.G. Johnson, and Manse Elementary Schools (See Table 1A). Utilizing a coaching and interview process, Dr. Pradere helped the team clarify the service model and the type of data collected during the evaluation process. An outline of the evaluation model was created and shared with the team after each planning meeting. The team provided specific feedback,

further refining the model. After completing the initial development process, Dr. Pradere and Mr. Hammar attended the external evaluator training facilitated by the Nevada Department of Education. After completing the training, Dr. Pradere and Mr. Hammar reviewed the evaluation model and produced a final draft. In December 2020, Mr. Hammar presented the model to the Nevada Department of Education (NDE).

Once the plan was completed, the evaluation team met monthly to monitor progress and make system changes as data became available. This process allowed the team to operate the program, review program information, and make necessary adjustments as data became available. The evaluation team followed the evaluation plan and data collection procedures as designed. It is the information collected through that process that has formed the foundation of this evaluation document. (See Appendix A: Program Evaluation Plan, p. 25)

Impact of the COVID19 Pandemic on services:

In order to comply with state guidelines handed down by Nevada's Governor, Nye County School District (NCSD) adopted a hybrid school model that moved schools to a combination of in-person and virtual learning. The NCSD model placed students at school in person two days per week (Monday, Wednesday, or Tuesday, Thursday) and then in the virtual model for three days. One of those days, Friday, was virtual for all students. During in-person days students follow a traditional school schedule attending each of their classes. Teachers and students worked together to address essential learning elements related to each unit of study. During virtual days, students completed their work at home independent of the teacher. However, they were able to reach out to teachers virtually at specified times to get additional assistance. In terms of the SAFE Program, participating students attended during their in-person days. This model was in place from the start of school until mid-November 2020 for most students. The exception was special education students who attended in-person classes four days per week. This level of service was aligned with their Individualized Education Plan (IEP). In early December, other high-needs students, including additional IEP, English Language Learners (ELL), and high needs students, came back to campus four days per week. In February 2021, the rest of the student body started returning to the four-day in-person model.

Students were only able to access the SAFE program during in-person days. This change significantly reduced the number of students who could be designated as 30, 60, and 90-day participants. The average daily attendance while employing the full hybrid schedule was approximately 30 students per day. When most students moved to the 4-day in-person schedule in February, the average daily attendance jumped to about 60 students per day.

As with all other in-person activities across their community, COVID 19 created issues with social distancing and required staff to make changes to meet the expanded spacing requirements for students. Spacing rules changed planned activities' dynamics and included shifting many activities away from group-based to independent activities. There were also breaks in service at the school due to COVID, where staff and students could not attend as a result of exposure to the disease. Although the staff worked very hard to overcome these barriers, these issues affected both the learning opportunity and quality of service.

In a traditional year, Manse staff designed and delivered enrichment experiences as four consecutive day activities where students interacted with the project on four successive days, Monday through Thursday. This model supported ongoing experiences that provided students the opportunity to work through

complex projects. One example is the development of a Lego Robotics Model. This project goes through the planning, building, and operating stages of constructing the Lego Model. This continuous system did not work well in the hybrid model, so SAFE staff adjusted the activities to be single-day enrichment experiences. The adjusted system remained in place until February. Once the school moved to the four-day in-person model, the staff offered the expanded four consecutive day enrichment opportunities for participating students. Despite these challenges, the SAFE staff continued to provide high-quality services to students who participated in the program.

The general theme of program services:

The SAFE Program followed the 21st Century guidelines provided by both the U.S. Department of Education and the Nevada Department of Education. It provided services to students in a manner that addressed both academic and enrichment requirements. The academic portion was directly aligned to work completed in the classroom. The work centered on homework and assessment opportunities that gave students an academic boost. The enrichment portion aligned students with applied experiences in mathematics, English Language Arts (ELA), and science.

The SAFE Program aims to support students in being successful in the regular classrooms while expanding their interest and academic potential in ELA, math, and science. The program typically targets academically underperforming students that require additional assistance to stay on par with their peers.

The SAFE staff worked very hard to build a welcoming environment and to provide high-interest activities for students. In addition, the team constantly worked to connect with students and help them feel part of the program. As a result, students often shared that they enjoyed the program and felt like it helped them improve their overall school performance.

Many students struggled with the hybrid model, and the SAFE program provided an essential bridge to meet their academic requirements. In the hybrid model, students worked independently from home three days per week. As a result, many students could not complete the required assignments in that environment. The SAFE Program provided the additional time and assistance needed to complete missing homework, make-up exams, and complete other necessary tasks to stay on target.

The movement back to in-person learning has helped to expand the enrichment opportunities. This change led to the use of activities like 4-h, Red Rover, Lego robotics, and others.

Throughout the 2020-2021 school year, SAFE staff delivered the program with fidelity and provided learning opportunities considered high-interest, high-quality learning experiences for participating students.

General facts about the school and the SAFE program:

Manse Elementary is a public elementary school located in Pahrump, Nevada, that provided academic services to approximately 475 students per year. The ethnic make-up of the student body was primarily white (56%), Hispanic (32%), multiracial (9%), black (2%), and Native Americans (1%). The school is considered high poverty as 100% of the student body is eligible for Free and Reduced-Price Lunch (FRL).

The demographic make-up of students participating in the SAFE Program is closely aligned with the general student population. The table below represents the population of students who participated in the SAFE program.

Table 1A: SAFE Program Demographic Makeup

Manse Elementary 2020-2021 School Year SAFE Student Data

Students	Total	30 day +
	93	79

Manse - Participant Gender Make-up

English Language Learner EL 1 1% 0 0%						

<u>Table 1A: Demographic make-up:</u> Represents demographic make-up of the entire population of students who participated in the SAFE program (93 students)

Student recruitment and selection for the SAFE Program:

Manse staff operated the program as an intervention-based model. A combination of SAFE staff, classroom teachers, administrators, and teacher interventionists identified students struggling academically and then recruited those students to be part of the program. These students were typically underperforming in one or more academic areas, and the goal for these students was to join the SAFE program to improve their grades quickly. Usually, within one or two days, students could address their short-term academic deficiencies. This type of intervention focused on helping students catch up and improve their current grades within one or two days.

In addition, the SAFE Program provided students the opportunity to participate in high-quality, high-interest enrichment opportunities. The program help students to expand their personal and academic horizons. Finally, staff considers this program a place where students can safely connect with the educational system. This connection allows students to be more successful during the school day.

Program days and hours of service:

School year program:

The SAFE Program operated from August 31, 2020, through May 19, 2021, and it included 128 days of service at 16 hours per week. Student services ran from 7:30 am to 9:00 am and 2:45 pm to 5:15 pm, Monday through Thursday. By utilizing this time frame and days of service, Manse Elementary met the after-school requirements of 120 days of service at 12 hours per week established by the Nevada Department of Education NDE.

Summer session:

No summer session was offered during the 2020-2021 school year.

Program location and supervision:

The SAFE Program was a school-based program facilitated by the NyE Communities Coalition in coordination with the Nye County School District (NCSD). The daily program operation was facilitated by site coordinator Jennifer Nelson and assistant site coordinator Susan Hoxie. The program director was Jeff Hammar, the Director of Wellness/SAFE Elementary Program for the Nye Communities Coalition.

Program location:

Manse Elementary School 4881 N. Lola Ln, Pahrump, NV 89060 Pahrump, NV 89061

Supervisory Organization

NyE Communities Coalition 120 E. Wilson Rd. Pahrump, NV, 89048

The NyE Communities Coalition supervised the project and served as the fiscal agent.

Staffing:

In order to implement the SAFE program, the NyE Communities Coalition hired a total of thirteen staff members. These included seven school day teachers, two administrators, and four additional non-teaching staff members.

Staff Training:

During the 2020-2021 school year, there were four training opportunities provided to staff. The training supported systems operations, program improvement, and program management opportunities. The specific training sessions are listed below in Table 1B.

Table 1B: Professional Development for Staff Members

Professional Development	Number of Staff
District level training	2

<u>Table 1B: Professional development for staff members:</u> Represents the training and attendance opportunities for staff members for the 2020-2021 school year

Program Terms:

Morning program:

- Morning start-up 7:30 am to 8:15 am: Students begin arriving at the program at 7:30 am, where
 they sign in and move into the multipurpose room where the SAFE staff greets them. Students
 get started on completing their homework or moving into some optional activity centers that staff
 put together. The optional activities included Legos, Wiki Sticks, reading, coloring, drawing, or
 access their chrome book.
- Whole group academic activities 8:15 am to 9:00 am: During this time, students move into a whole group academic activity led by SAFE staff. These experiences focus on core academic areas, including guided art and science projects.
- <u>Exit morning program 9:00 am 9:10 am:</u> students transition into their classrooms and begin their regular school day. Instructors pack up supplies and clean tables.

Throughout the morning session, staff coordinates the student activities while maintaining close supervision of students in both learning centers and whole-group activities. Students remain highly engaged throughout the process.

Afternoon Program:

- <u>Afternoon check-in: 2:45 pm to 3:10 pm:</u> Students check into the program at the multipurpose room, gather their snacks, and have some time to eat their snacks with others before transitioning into the program.
- <u>3:10 pm to 3:30 pm:</u> Students move outside to participate in recess activities, where SAFE staff supervises them in general outdoor movement experiences. The time is spent in the outside activities areas, including play structures and athletic fields.
- <u>3:30 pm to 4:30 pm:</u> Students meet with their grade level teacher and focus on Math, Reading, and Phonics. This is a time for students to expand their academic skills and includes the following activities:
 - Math
 - Reading and Writing
 - Science and Social Studies
- <u>Preferred Enrichment Activities 4:30 pm to 5:15 pm:</u> Students move to preferred enrichment activities which include Art Lessons, Physical Education, Coding, Space Camp, Zumba, Pick a better snack, reading club, science exploration, STEAM, Lego Robotics, 4-H, and Red Rover.
- <u>5:15 pm to 5:30 pm Check out closing the Program:</u> Students check out with their parents from the multipurpose room. Staff closely supervise the check-out process making sure students safely exit the program.

As in the morning sessions, staff closely monitor student activities, keeping them engaged through each of the afternoon's experiences.

Table 1C: Enrichment activities 2020-2021 School Year

Enrichment Activities Included the following:				
Arts and Crafts	fts School-related arts and crafts activities			
Lego robotics	Students designed, coded, programmed, and operated lego robots.			
STEAM	Teachers design hands-on high-interest science, engineering, and math activities that help build essential			
	applied science skills for participating students.			
Pick a better	This project is funded through a SNAP ED grant. This direct education and social marketing intervention			
snack	aim to increase fruit and vegetable consumption and promote daily physical activity among children.			
S. Nye County	This project provided presentations to students on plants, animals, and robotics. Students received home			
4H	gardening literacy kits that they took home to complete with their families.			
Physical Educ.	Staff developed a series of activities that promote movement and skill development.			
Red Rover	Students completed a physical fitness unit with the Red Rover group. Students receive guidance and fitness			
	development during a three to four-week period. At the end of the training period, students tackled an			
	obstacle course that allowed them to demonstrate their fitness and skill levels.			
Child Abuse	This program followed the Child Help Speak Up Be Safe Curriculum. During two 35-minute sessions, a			
Prevention	trained facilitator presented research-based, age-appropriate lessons to help children learn the skills to			
	prevent or interrupt cycles of neglect, bullying, and child abuse (physical, emotional, and sexual.) The			
	Childhelp Speak Up Be Safe curriculum includes information for children, parents, teachers, and			
	communities to reinforce important safety rules.			

Table 1C: Represents the enrichment activities offered to SAFE participants during the 2020-2021 school year.

Program attendance:

The federal guidelines for the 21st-century program recognize the importance of extended student performance. One of the primary thresholds is having students attend for at least thirty days. During the 2020-2021 school year, a total of seventy-nine students attended thirty or more days. Typically, the school would have over one hundred students meet the thirty-day threshold. The challenges posed by the COVID 19 Pandemic and the subsequent hybrid school schedule severely limited the in-person opportunities for students to attend the program. Staff anticipates a return to a traditional school schedule during the 2021-2022 school year.

Table 1D: SAFE Attendance 2020-2021 School Year

30-day attendees				
1–29-day attendees	14	15.1%		
30-day attendees	26	28.0%		
60-day attendees	49	52.7%		
90-day attendees	4	4.3%		
Total 30+ day attendees	79	84.9%		
Total	93	100%		

Table 1D: Number of 30, 60, 90 days participants for the 2020-2021 school year.

Additional student attendance data represents a monthly comparison between the 2019-2020 school year and the 2020-2021 school year. Please note that before the 2019-2020 COVID 19 school shutdown, average daily attendances ran at approximately 80 students per day. In 2020-2021 Manse implemented a hybrid schedule where students only attended school and the SAFE program two days per week. During this time, daily attendance from August to January ranged from nineteen to thirty-four students. Attendance picked up significantly in February when the school moved to a four-day per week traditional schedule. Attendance increased to an average daily rate of approximately sixty-five students. As expected, challenges related to COVID 19 significantly reduced the opportunity for students to participate in the SAFE program. It is anticipated that program participation will increase under normal school conditions that should be in place for the 2020-2021 school year.

Figure 1B: SAFE Program Attendance Comparison 2019-2020 and 2020-2021 School Years

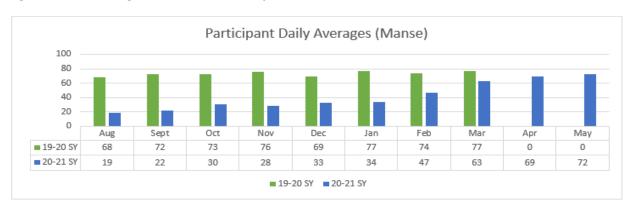

Figure 1B: Average daily attendance comparison by month for the 2019-2020 and 2020-2021 school years.

Family engagement:

During the 2020-2021 school year, the COVID 19 Pandemic limited parental opportunity. However, the SAFE program was able to offer three family engagement opportunities that included virtual art night, the Home Depot building and painting project, and the end of year celebration. In all, forty-seven parents participated in these activities.

Transportation:

The SAFE program does not offer transportation for participating students. Parents bring students to and from the program each day.

Advisory committee:

At the start of the 2020-2021 school year, each of the 21st Century or SAFE programs facilitated by the NyE Communities Coalition utilized a separate Advisory Committee. In other words, each site program ran its own advisory committee. However, the programs at Hafen, Manse, J.G. Johnson, and Floyd Elementary Schools virtually mirror each other. They follow very similar timelines, academic interventions, and enrichment opportunities. In addition, Pahrump is a relatively small community with a limited number of community partners. In order to better leverage support for each program, the program Director, Mr. Jeff Hammar, worked with each school site to develop a single, systemwide SAFE Advisory Committee that would address the needs of all four campuses. The first two meetings operated from a site-based model and took place on October 8, 2020, and January 30, 2021. The third systemwide meeting took place on April 30, 2021, via a zoom platform. This shift created a much more robust meeting and worked as Mr. Hammar intended. The quality of conversations and levels of program support generated for each campus due to this change far exceeded that of the site base meeting. Please see the SAFE Advisory Meeting agendas and minutes on p. 36.

Field trips:

SAFE staff did not schedule any field trips for the 2020-2021 school year due to the Covid 19 Pandemic.

School connections:

As stated earlier, the academic interventions were based on a homework support model. The academic support focused on assisting students to complete their homework and improve their grades in each of their content areas. Teachers provided homework help to students by first accessing Canvas and assisting students in identifying and then completing quizzes and assignments. Teachers worked with students to first be sure that the student could complete the task independently. If so, they monitored progress and made sure the homework was completed. If the student required further guidance, the supervising teacher provided a mini-lesson to understand the expectation and complete the required task. This process created a tight connection between work completed at SAFE and the required work assigned by the classroom teacher.

The enrichment activities followed the 21st Century formula and were designed to generate student interest and expand the academic horizons of program participants. The staff created activities that allowed students to participate in physical activity, health, music, art, and STEM experiences. The experiences were grade-level appropriate and helped develop the students' academic foundation in alignment with school expectations.

Program partners:

The NyE Community Coalition has formed several partnerships to support the SAFE program. The partners include:

- AmeriCorps: Supported program staffing in coordination with NyECC.
- Child abuse prevention: During two 35-minute sessions, a trained facilitator presented research-based, age-appropriate lessons to help children learn the skills to prevent or interrupt cycles of neglect, bullying, and child abuse (physical, emotional, and sexual.) The Childhelp Speak Up Be Safe curriculum includes information for children, parents, teachers, and communities to reinforce important safety rules.
- Pick a better snack: This enrichment element was funded through a SNAP-ED grant. This direct
 education and social marketing intervention aimed to increase fruit and vegetable consumption
 and promote daily physical activity among children.
- **Red Rover:** Physical fitness organization that facilitates a health and physical fitness program for the SAFE project
- So Nye County 4H: This project provided presentations on plants, animals, and robotics to participating students. Students received home gardening literacy kits that they took home to complete with their families.

Student Academic Performance

In order to measure the academic performance of students who participated in the program, there were three student performance measures considered. The first measure was the number of students who passed both their math and ELA courses during the second and fourth quarters of the 2020-2021 school year. The second measure was the change in student grades between quarters I & II, II & III, III & IV, and I & IV. Finally, a third determined if each SAFE participant met their Rasch Unit (RIT) growth targets on the ELA and mathematics on the FALL to WINTER administration of the MAP assessment.

Student Pass Rate Percentages in Mathematics and ELA

Overwhelmingly, SAFE participants passed their courses during each quarter in the areas of ELA and Math. The percentages improved from 81% of the participants passing to 91% passing in mathematics, and ELA remained high at a 95% pass rate.

Manse Elementary % SAFE Participants Who Passed Math and ELA Courses 2nd and 4th Quarters 94% 95% 100% 91% 90% 81% 80% 70% 60% 50% 40% 30% 20% 10% 0% Math Quarter II Math Quarter IV ELA Quarter II ELA Quarter IV Manse Elementary SAFE Participants who passed their ELA and Math courses at 2nd and 4th Quarters Math Quarter II Math Quarter IV ELA Quarter II **ELA Quarter IV** All Participants % Passed 94% 81% 91% 95% #Passed 60 72 65 74 #Failed 14 19 24 15 Score not available 93 Total 93 93 93

Figure 1C: Percentage of SAFE Students Who Passed their Math and ELA Courses by 2nd and 4th Quarter

Figure 1C: Represents the number and percentage of students who passed their math or ELA course

Overall, 30-day attendees demonstrated a very high pass rate for the 2nd and 4th quarters. There was an 11% increase in math and an 8% increase in ELA over that same time. The upward trend between quarters was encouraging. The thirty-day attendees demonstrated good progress in meeting their requirements and passing their classes, especially during Quarter IV. Thus, the combination of in-school and after-school services supported a marked improvement in the number of students passing their classes between Quarter II and Quarter IV.

Figure 1D: Percent of SAFE 30-Day Attendees Who Passed Their Math & ELA Courses 2nd & 4th Quarter

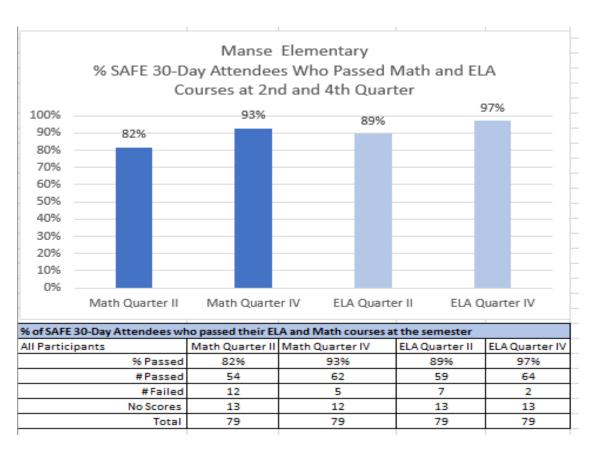

Figure 1D: Represents the number and percentage of 30-Day Attendees who passed their 2nd & 4th Quarter math or ELA courses

Grade Changes by Quarter:

Figure 1E: 2020-2021 Quarterly Grade Comparison for All Safe Participants in Math and ELA

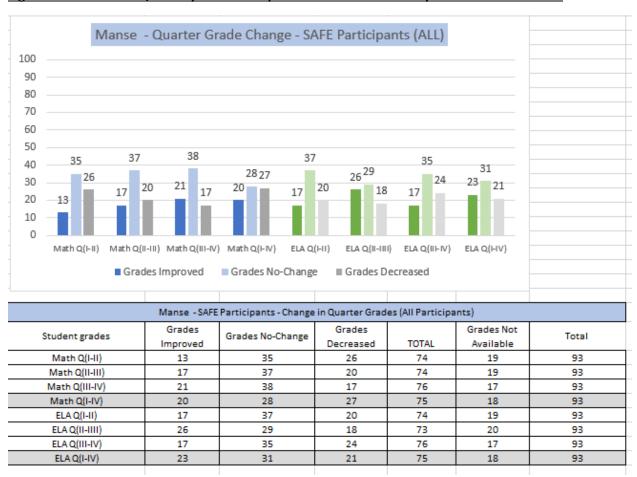

Figure 1E: Represents the comparison of grade changes in math and ELA for all SAFE participants by quarter for the 2020-2021 school year.

In reviewing the change in grades between quarters, there was very little change in grades between quarters across the board. In the previous section, we see some definite improvement in students passing classes at Quarter IV. However, the data did not reflect a large number of grade changes across the board over time.

Figure 1F: 2020-2021 Quarterly Grade Comparison for All 90 Day Attendees in Math and ELA

Figure 1F: Represents the comparison of grade changes in math and ELA for all 30-day attendees by quarter for the 2020-2021 school year.

Similar to the All-SAFE group, there was very little change in grades for the 30-day attendees. As stated in the previous section, there was a reduction in failing grades between Quarter II and Quarter IV, but there was very little change across the grade spectrum when considering all the scores A through F.

NWEA MAP results:

The Nye County School District administers the MAP assessment in the fall and winter each year. The results of these assessments were used to review student progress in English Language Arts (ELA) and math against the performance of similar students from across the country. As students take the exam, the assessment adjusts the knowledge and level of rigor the student is exposed to based on each response. In essence, as students answer questions, the depth of knowledge and difficulty increases as each correct response is provided. If students respond incorrectly, the complexity of questioning moves down. This process allows the MAP program to formulate a reliable picture of what each student knows and can do. Once compiled, the results provide a comprehensive picture of what students have mastered and what content requires additional attention.

Along with providing a skill-based picture of every student, the MAP assessment also provides a projected level of growth. On a national level, students should build essential skills each month, which can be measured in RIT points on this exam. In other words, as students gain skills that are measured on the exam, the RIT points earned by each student go up.

The MAP assessment can also be used as a diagnostic tool to measure student skills across the essential state and national standards in both ELA and math by looking at the RIT score earned by each student. By utilizing the RIT to Concept map, school staff can identify the specific skills that students have mastered on a majority of the essential state standards in the core areas of math and ELA. Currently, the SAFE staff is not using the RIT scale to identify student skill sets and provide interventions based on that information. However, they are assisting students with their homework, which does help to improve student skills. In a general way, the SAFE Program supports students to better understand the content they are learning in the classroom. The MAP assessment will measure the extent to which students have mastered essential learning connected to state and national standards over time. For purposes of this study, the researcher is attempting to determine if SAFE students mastered essential standards at the same rate as their national norm peer group on the MAP assessment. In other words, did the RIT point growth for the SAFE students meet that of their national peer group?

Many factors can impact student growth scores on the MAP assessment, including the quality of instruction in the classroom, student connectedness to the learning experiences, and possibly support students received in the SAFE program. Therefore, if students meet their RIT growth targets, we cannot attribute that success to the SAFE program alone. However, we could say that the SAFE program may have contributed to student success on the MAP assessment.

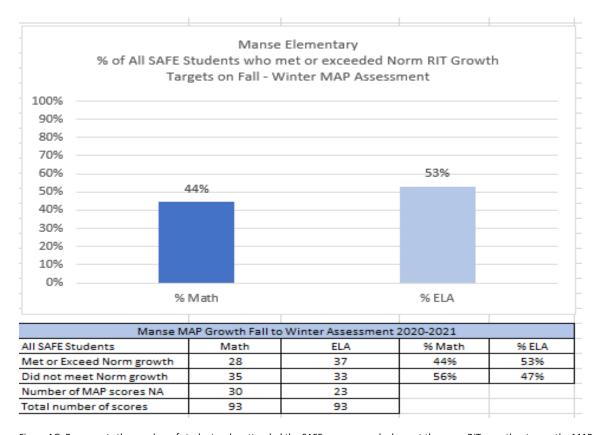

Figure 1G: 2020-2021 Fall to Winter MAP Comparison for All SAFE Students

Figure 1G: Represents the number of students who attended the SAFE program and who met the norm RIT growth rates on the MAP assessment.

Schools that perform at the national average on the MAP assessment will have at least 50% of their student population meeting the RIT growth targets on the fall to winter administration of the MAP assessment in both reading and mathematics. The SAFE students at Manse elementary performed relatively well on the MAP assessment in terms of growth. In the area of math, 44% of the participating students met or exceeded the growth target. In ELA, performance was better. Approximately 53% of the participating students met the projected growth targets between the fall and winter administration of the MAP assessment. Considering this was a pandemic year, staff should be pleased to see that the student performance was close to the expected growth rates in both math and ELA.

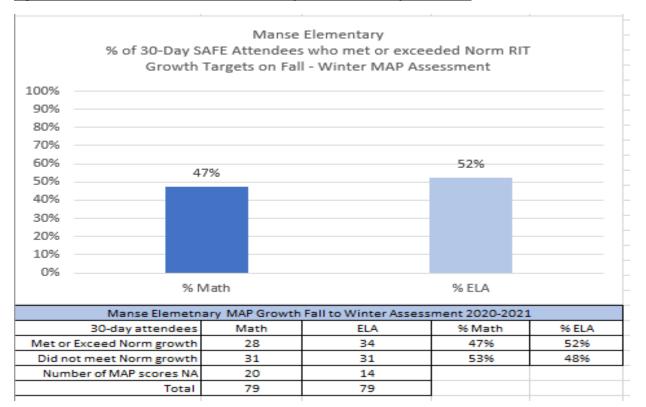

Figure 1H: 2020-2021 Fall to Winter MAP Comparison for 30-day Attendees

Figure 1H: Represents the number of 30-day attendees who met the norm RIT growth rates on the MAP assessment.

The performance level for 30-day attendees was very close to the All SAFE attendee group, with 47% of the students meeting their growth targets in math and 52% in the area of ELA. As stated above, staff should be very pleased with these results, especially when considering the application of the hybrid model to the typical school day. Clearly, despite the challenges set forth by the COVID 19 pandemic staff and students saw positive student growth on the MAP assessment.

In looking deeper into these numbers, there is still a large percentage of students who did not meet their academic growth targets in ELA and math. Staff may want to consider targeted interventions for underperforming students in the future to help them overcome the academic achievement gap. These interventions could be connected to the NWEA RIT to Concept tools, which can identify the specific skills that students have mastered and those that students need more assistance on. Utilizing this information, teachers can help plan instructional supports to assist students in meeting their academic expectations in these key areas moving forward.

Overall, in both the areas of math and ELA, students performed relatively well on the MAP assessment. The combination of services in the classroom and the after-school program helped students to maintain progress during this very challenging year.

Program Systems Review:

Program strengths:

The SAFE Program implemented the 21st Century model with fidelity. Staff met program requirements and provided opportunities for students to receive academic support and participate in enrichment activities that expanded their horizons.

The program strengths include:

- Creating a positive and supportive environment
 - Applying safe, efficient check-in and check-out
 - Greeting students warmly, connecting to students throughout the program
 - Developing an environment that promoted a sense of belonging
- Connecting students to classroom work through the use of the Canvas learning management system
 - o Teachers connecting with students when they arrive at each academic session
 - Providing effective support and guidance to students as they work through their assignments
- Providing an appropriate combination of homework help and enrichment opportunities
 - Facilitating strong enrichment activities that are of high interest and, in many cases, build upon academic work
- Staff kept students actively engaged in both homework and enrichment sessions
- Procedures and transitions:
 - Students were clear about expectations and moved through appropriate activities requiring limited guidance
- Documentation Procedures:
 - The SAFE staff has established routines to collect the required information and post the required data in CAYEN. They are also working with the Nye County School District office of accountability to have required data imported into the CAYEN system.

Program challenges:

- Instructional scaffolding
 - One of the challenges identified in this program is that much of the support is focused on homework help. Although the homework help model will assist students in completing an assignment, it may not be enough to master an essential skill. There are cases where students may require additional scaffolding and experiences to master specific knowledge or skill.
 - Along this same line, the MAP assessment can be used to define specific skillsets for students. Utilizing this information, SAFE staff can develop specific intervention experiences that can be used to develop student skills for the long term. This MAP-related targeted intervention could be used along with the homework help model to allow students to develop essential skills and improve their overall performance in the classroom and on state standardized tests.

- If SAFE Staff decide to include the MAP component, they may want to consider dividing their program into three separate elements: homework help, enrichment, and academic enrichment. The academic enrichment would serve as a connection to the MAP component. Students would work with teachers during the academic enrichment time to build the skills identified on the NWEA RIT to Concept Tool. This three-pronged approach may provide the opportunity for students to receive direct interventions on skills that they will need moving forward. By retaining experiences that support homework help and enrichment opportunities and adding support with skills identified on the MAP, staff could increase the academic potential of each student that it serves.
- If SAFE staff move to add this third component, they should also use a targeted selection process for participating students. The selection process may lead to identifying students who may be low performing but also fall within specific RIT performance ranges. This process would allow the school to identify the students who have the highest academic need and use the MAP information to group students so that the interventions could be more aligned to the skill sets of the participating students. If staff proceeds with this change, it is recommended that the school use data from the fall, winter, and spring administrations of the MAP assessment.

• Students leaving the program early:

An additional challenge is parents picking students up early from the after-school portion
of the program. This early exit does not allow staff to provide the services they have
planned for students. In the coming year, the staff anticipates setting up a policy and
working with parents to encourage students to attend the full program each day.

Connecting the SAFE Program to the School Performance Plan (SPP)

There is not a clear connection between the SAFE Program and the school performance plan. School staff has not identified clear performance targets for students being served by the SAFE program. Also, there are no definitions of how the SAFE program can be used to address school performance with the support of the SAFE program. If the school is able to serve over a hundred students, as it typically does in a non-covid year, and the interventions provided during the SAFE program are combined with success in the classroom, then RIT scores on the MAP will go up. This improvement is likely to help elevate the school's performance rating on the Nevada School Performance Framework, which is used to measure school performance in Nevada.

Summary:

The Manse SAFE team has a well-established program that implements the 21st Century program in alignment with the requirements set forth by the Nevada Department of Education. Despite the challenges set forth due to COVID 19, staff provided high-quality experiences for the students. As noted in the program strengths above, they established safe and effective routines for implementing the program. They divided student services between academic support and enrichment activities. They effectively addressed check-in & check-out procedures and worked closely with their advisory board to continue implementing the program. Finally, SAFE staff continually worked with students to build relationships and support students to meet their academic responsibilities.

Recommendations:

As noted throughout the report, SAFE staff built and implemented a strong program falling within the framework set forth by the Nevada Department of Education. The SAFE team should continue implementing the program addressing academic support and enrichment opportunities for the students they serve.

In order to improve the program site leadership should consider the following:

- Connect the SAFE program to the School Improvement Planning process. This should include
 addressing specific student performance goals for the SAFE program. It should also identify how
 the SAFE Program can support school performance initiatives as specified on the School
 Performance Plan.
 - Once goals are set, site staff should set specific benchmarks, timelines for gathering data, and methods for reporting SAFE program results to key stakeholders over time.
- Consider building opportunities to use MAP data to identify specific student skills and plan for interventions to improve student performance on classroom and state assessments.
- Follow through on the plan to encourage full session attendance during the after-school portion of the program.

Finally, I would like to recognize the SAFE staff for the ongoing support of the students that they serve. They continue to create a system that leads to increased academic performance and expands student learning opportunities through the use of high-leverage enrichment experiences.

Appendix A: Program Evaluation Plan

Description of the process:

The process began with Dr. Pradere and Mr. Hammar facilitating multiple planning meetings with the program evaluation team. This team included representatives from each of the participating schools. The schools include Floyd, Hafen, J.G. Johnson, and Manse Elementary Schools (See Table 1A). Utilizing a coaching and interview process, Dr. Pradere helped the team clarify the service model and the type of data collected during the evaluation process. An outline of the evaluation model was created and shared with the team after each planning meeting. The team provided specific feedback, further refining the model. After completing the initial development process, Dr. Pradere and Mr. Hammar attended the external evaluator training facilitated by the Nevada Department of Education. After completing the training, Dr. Pradere and Mr. Hammar reviewed the evaluation model and produced a final draft. In December 2020, Mr. Hammar presented the model to the Nevada Department of Education (NDE).

21st Century program evaluation outline -

The evaluation team followed the report outline provided by the Nevada Department of Education in the 21st Century Community Learning Centers (21st CCLC) External Evaluation Guide to develop this program evaluation plan (NDE, 2020)

- 1. Introduction and fact sheets
- 2. Program overview
- 3. Process evaluation plan and results

	Process Evaluation Plan					
Process Question	Process Measure	Data collection method and timeline	Responsible party			
Adherence: Is the Program being implemented as designed?	Description of the program model per site and verification of the use of the model	The site coordinator will produce a program description at the start of the current school year	Site coordinator			
	The Center provides opportunities for academic support.	Observe academic support activities regularly	Site coordinator Program director External evaluator			
	The Center provides a variety of additional services, programs, and activities (enrichment activities)	Observe enrichment support activities regularly	Site coordinator Program director External evaluator			
Exposure: What are the attendance rates of the participants?	Percentage of students who attended programming for more than 30, 60, and 90 days during the school year	Daily attendance records will be reviewed monthly	Site coordinator External evaluator			
Quality: Is the Program being delivered in a high- quality manner?	The program staff completes a program self-assessment	Formal program observation will be conducted using the academic skill-building PQA — Observation and data collection will take place during the fall semester. The information includes a report of staff training	Site coordinator Program Director External evaluator			
Engagement: How are participants responding to the program?	Percentage of stakeholders who report positive responses to program experiences: Students Parents Teachers	Parent, student, teacher survey results Survey results will be collected in March - April	Site coordinator Center Staff Data tech			

4. Outcome evaluation plan and results

Outcome	Performance	Participants	Data collection	Data analysis	Responsible
	measure		procedures	and reporting	Party
Elementary: Do students grades in reading and math improve when they participate in the 21st Century program	Student report card grades	Students – grades 1-5	Student results will be collected and shared quarterly.	Descriptive statistics comparison	Site coordinator External evaluator Program director
Elementary: Do students who participate in 21st-Century program interventions meet their growth targets on the MAP assessment?	Student growth on the MAP assessment Additional comparison of 30, 60, 90-day participants	Students – Grades 1-5	Map results will be collected after the spring administration of the MAP assessment and will be used to compare fall and spring data for student growth	Descriptive statistics comparison	Site coordinator External evaluator Program director

- 5. Summary of strengths, recommendations, and next steps
- 6. Appendix
 - a. Executive summary
 - b. Additional data

Data Collection Table:

	Prod	cess Data Collection (Section I)		
Process elements	Process Measure	Data collection method – Review Method	Timeline	Responsible party
Program description	Program fact sheet. - Description - Enrichment opportunities - Family engagement opportunities	Site coordinators produce a short program description, including enrichment opportunities for the program	Quarter 1 and is updated quarterly	Site coordinator
Program information times of service sheet	Program information times of service sheet (Utilize NDE template)	Site coordinator completes program information times sheet	Quarter 1 and is updated quarterly or more often as needed	Site coordinator
Program review against 2020- 2021 Nevada 21 st Century Community Learning Center State Requirements (Include COVID 19 Flexibilities)	Compare program services to the NDE 21 st Century Community Learning Center State Requirements	The evaluation team will review current services against state requirements. If the site-level program has applied for a waiver, the changes will be part of the review.	Quarter 2 and is reviewed quarterly or more often as needed	Program Director Evaluation Team External Evaluator
Participation verification	Program attendance	Program staff will gather and report the number of 30-60-90-day participants.	Monthly	Site coordinator Data Tech
Program Quality Assessment	Academic Skill-Building: School Age PQA and Academic Skill-Building Supplement	The program director will pull together a team to perform the program observations utilizing the School-Age PQA Instrument. The evaluation team will use the information collected during this process to develop a Continuous Quality Improvement Plan (CQIP).	December – January 2020 (Target areas from the CQIP reviewed monthly for progress)	Program Director Site Coordinators External Evaluator

	Prod	cess Data Collection (Section II)		
Process Elements	Process Measure	Data collection method – Review Method	Timeline	Responsible party
Impacts of COVID 19 (Changes in operations)	Description of COVID impact on the program	Site coordinators will provide a summary of the impact of COVID 19 on the program each month. The summary may also include mitigating actions taken by the site team to address these challenges. Site coordinators will share the information with the evaluation team at the monthly meetings.	Monthly	Site coordinator
Perception surveys from stakeholders, including: Teachers Parents	Stakeholders complete the survey during the projected data collection window	The site coordinator will work with site staff to distribute and collect surveys from stakeholder groups	March - April	Site coordinator Data Tech
Students		External evaluator will support in the process of creating methods for sharing this data (Descriptive/Visual Statistics)		External Evaluator
Advisory Committee Meetings	Meeting Minutes	Site coordinators will provide an agenda and minutes for program advisory meetings	Quarterly	Site coordinator Program director
Staff training information	List of training that staff attended during the 2020- 2021 school year	The program director, in conjunction with site coordinators, will create a list of training attended by 21st Century staff for the 2020-2021 school year	Quarter 2 and is updated quarterly or more often as needed	Program director Site coordinator

		Outcome Data Collection (Section I)		
Outcome Elements	Outcome Measure	Data collection method – Review Method	Timeline	Responsible party
Student Grades	Student report card – quarterly grades	Grades will be collected quarterly and uploaded to the CAYEN system (Data may be entered by school district staff utilizing data transfer from Infinite Campus.)	Quarterly – TBA	Program Director Data Tech
		Data will be processed utilizing descriptive statistic methods		External Evaluator
Progress on MAP assessment	MAP growth targets	Test administered in Fall and Winter by the school district. Results will be posted to the CAYEN system as they become available. (Data may be entered by school district staff utilizing data transfer from Infinite Campus.)	Administered fall and winter	Program Director Data Tech
		Data will be processed utilizing descriptive statistic methods	Data processed after winter implementation Data shared with evaluation teams when available	External Evaluator
SBAC Results	SBAC Results	The school district will administer the test during the spring semester. School District staff will enter the information into the CAYEN system when results become available.	Spring	Program Director Data Tech
		SBAC results will be included in the evaluation once they become available.		External Evaluator

Leadership Team Meeting Dates:

The leadership team plans to meet once per month to review progress and prepare for the advisory committee and evaluation team meetings. This time together will allow the leadership team the opportunity to review data and determine the next steps. This pre-work will provide program leadership the opportunity to set up an environment that will allow the evaluation team to become active members in the process of reviewing data and making recommendations for program improvement. The leadership team includes Jeff Hammar, the SAFE Program Director, Karen Holley, Coordinator of State and Federal Programs, and Steven Pradere, Ph.D. the External Evaluator.

Meeting dates:

- December 11, 2020
- January 15, 2020
- February 12, 2020
- March 19, 2020
- April 9, 2020
- May 14, 2020

Evaluation Team Meeting Dates:

Mr. Hammar and Dr. Pradere will co-facilitate the evaluation team meetings, which will occur once per month. During the sessions, team members will review data and provide recommendations for improvement. This shared responsibility model will form the foundation of a continuous improvement cycle.

Meeting dates:

- December 18, 2020
- January 22, 2021
- February 19, 2021
- March 26, 2021
- April 16, 2021
- May 14, 2021

Completion of the evaluation:

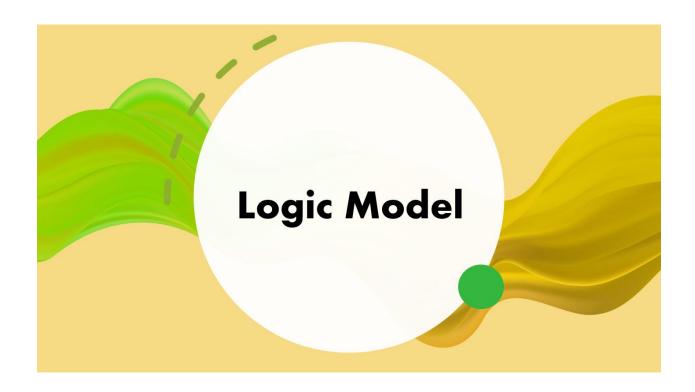

The completion of the evaluation is a year-long process. The program director, evaluation team, and the external evaluator will meet monthly to gather, share, and review program data. The information generated through this process will lead to program adjustments over time, thus creating a continuous improvement process for the program. At the same time, Dr. Pradere will be adding information to the evaluation report until it is completed in June of 2021. This version will serve as a final report as long as the student performance data is available at that time. If additional data is made available after June of 2021, the external evaluator will add this new information to the final report before the state deadline of November 1, 2021.

Appendix C: Advisory Committee Agendas/Minutes

Manse E.S. SAFE Advisory Committee Meeting 10/08/2020 3:00

- Meeting Attendance
- Manse & General SAFE Overview: Enrollment & Attendance
 - a. Enrollment:
 - i. Manse: 79
 - ii. SAFE Total: Total enrolled to date for all sites
 - iii. SAFE Attendance Snapshot:
 - Average daily attendance all months: 22
 - 2. Average daily attendance September: 24
- Previous Minutes
 - a. No previous minutes. The first meeting of the 2020/2021 School Year.
- 4. SAFE Schedule

AM Schedule - Students can be dropped off from 7:30 till 8:15. When students are dropped off they come to the SAFE room and are offered a variety of activities. For example, they can do chromebooks, accessing sites such as prodigy, teach my monster to read or get epic. They can also use legos with task cards. Reading, word searches, ispys and crossword puzzles. At 8:15 we clean up and do a guided art project until 8:55. Students are then lined up to walk through the gym and get breakfast. One Staff member stays behind to sanitize everything used from that morning.

PM Schedule - Students are dismissed at 2:45. They all meet in the gym.

Attendance is taken and Students will receive snacks. Once everyone is done eating students are lined up to go outside with instructors. Once 2 hour teachers go outside one instructor will come in to clean and sanitize tables. Once she is done another instructor will come inside to sweep and head back outside. At 3:30 students are lined up by grade level and met by all teachers and instructors at lines. They are brought to a classroom for tutoring till 4:30. At 4:30 they go into activities. They do not switch rooms.

Current SAFE Activities - ** Tutoring overview attached**

Kdgn/1st is doing art lessons. 2nd/3rd is doing a health and wellness curriculum. 4th/5th is doing S.T.E.M. We originally agreed they would change every 6 weeks. However, we have had to push things back as teachers have projects they would like to complete. The

Manse E.S. SAFE Advisory Committee Meeting 10/08/2020 3:00

last day of these activities will be 10/15. We will be meeting 10/16 to revise our activities. Students must be picked up by 5:15.

- Recurring SAFE Clubs We have decided to not do any clubs at this time. This is because clubs are usually mixed with grades and due to COVID we are limiting that.
- SAFE Challenges Waiting list to have or not have them. Classroom capacity is 18. Are B-day for 2nd/3rd grade is up to 20..
- SAFE Improvements Allowed teachers planning time for tutoring or activities.
 At this time we all feel confident that we are operating to our best ability.
- Concerns and General Comments -

I reached out to teachers, I asked them what we can improve on and what they think is going well....

Jamie Carroll - One thing we can improve on is the SAFE staff knowing the basic school rules, like PBIS, keeping the outdoor building doors closed, sending a student with a pass to the bathroom, and the overall operations of Manse. Also, providing the staff with a red bag like the ones we get from our health aide would be awesome. She loves that they get planning time. She has been able to plan 2 months out and that has made her job feel less stressful. *They have bags they are supposed to take out. I did not realize they were not being taken out. That has been addressed. - PBIS they have had training. A refresher wouldn't hurt. - Possible virtual training led by Jamie Carroll ran on a Friday after 3pm???*

Jasmine Ujifusa - Improve: I think this year has been running great, however, I think better radios would make it so I could hear the calls for students.

Working well: I love the small groups and two teachers in the room during tutoring.

Micayla - Out of all three years, this is the most structured and smoothest program we have offered.

SAFE Advisory Board Meeting Agenda/Minutes April 30, 2021 1:00 P.M. Join Zoom Meeting

https://zoom.us/j/5548549889?pwd=QnZkdVR1TjFTaCs4VTBFZzNvdFJQQT09

Meeting ID: 554 854 9889 Passcode: SAFE2020

Agenda topics

- 1. **Welcome and introduction:** Jeff Hammar: *Have each advisory committee member introduce themselves and share their role and connection to the program.*
- 2. **General program progress:** Provide a general summary of program progress highlighting some of the success and challenges that have come up between advisory meetings
 - a. Academic enrichment: Site Coordinators Tutoring, Homework Help, Software products
 - b. Enrichment Activities/Partners:

Red Rover: Josh Melver,

4-H Stem Project: Stormy Ingersoll,

Lego Robotics

Child abuse prevention: Marlaina Porter

- c. External Evaluation: Steve Pradere: Student-Centered Institute for Educational Improvement.
- 3. Attendance and participation rates:
 - a. The state requires a minimum of 120 days of programming. Students must attend a minimum of 30 days to be counted as regular participant. We must provide a minimum of 12 hrs/wk.
 - b. 20-21 planned for 142 days and 375 regular participants
 - c. Current Projected Data: 132 days in session with 431 registered students. 309 students projected as regular attendees. Regular attendees by site: Floyd: Hafen: JG: Manse:
- 4. **Student performance data:** Jeff Hammar: *update on student data.*
- 5. **Survey data:** Update on Survey data. Student, Parent, and Teacher Surveys
- 6. **Program Concerns and Challenges:** Address any program challenges or concerns. If possible look for recommendations from advisory members.
- 7. **Program improvements:** If not addressed above, provide a general summary of program improvements that have taken place between meetings.
- 8. **Advisory board recommendations:** Gather information and feedback from the advisory board. Look for areas where the team can identify areas for program improvement
- 9. Future meeting topics: Identify future topics and verify the next meeting date

SAFE Advisory Board Meeting Agenda/Minutes

SAFE Advisory Board Meeting Minutes April 30, 2021 1:00 P.M. Join Zoom Meeting

https://zoom.us/j/5548549889?pwd=QnZkdVR1TjFTaCs4VTBFZzNvdFJQQT09

Meeting ID: 554 854 9889 Passcode: SAFE2020

Meeting Minutes on 4/30/21 from 1:00pm to 2:00pm

- 1. Schools talked about some things they do with their kids during programming:
 - Floyd- does programs that the school uses on chromebooks
 - Mase-Writing Brain, 1 on 1 tutoring, and small groups.
 - JG- Coordinates with teachers on using similar things, creative writing, work on handwriting, use programs the school uses
 - Hafen- academic 2nd hour and 1st hour legos or RR, also has a dance club and book club.
 - All schools do arts and crafts, legos, and RR
- Pick a Better Snack Program-Tamalyn Talor
 - May will be Strawberries
 - Does educational studies about being healthy
 - Works with 2nd and 3rd graders.
 - · She wants to continue the program into next year.
- Red Rover(RR)-Josh Melver
 - 2nd time coming to Pahrump
 - Wants to continue next year and also bring it into the schools themselves
 - · Helps fight for child obesity
 - · Coming out May 8th for finale RR obstacle course
- 4. 4H-Stormy(not present Jeff talked about program)
 - They send home take home packets with books and activities
 - They come around and help with lego robotics, they have their own team
 - They do fun activities for the kids and families like bring a trained dog to the safe program.
- Lego Robotics Expo and RR Finale
 - All 4 schools meet at Floyd, May 8th from 8am to 12pm at specific times to limit the amount of families and kids.
 - RR obstacle course outdoors and Lego Robotics Expo indoors
- 6. Child Speak Up Be Safe Program(no speaker, Jeff Talked about it)
 - · 2nd and 4th grade participated.
 - · Grant from the state to fund next year for 1st through 5th grades.
 - Kelly Hodge from RCMS held it this time, but Jeff wants to find 4 social workers or counselors for all 4 sites, to continue the program.

Meeting ID: 554 854 9889 Passcode: SAFE2020

7. External Evaluation- Dr. Steve

- Job is to help with looking at the program as a whole, and looking from the outside to help build a better structure.
- Makes sure we meet Federal and State guidelines

8. Americor- Sofia Allison

- 3 members currently working, 2 at Floyd, and 1 at Hafen
- · Plans to get more staff for next year
- Currently looking for 17 and up participates.

9.SAFE Parents

Floyd Safe Parent-Jackie and daughter Molina

- Feels that we should structure academic/tutoring time around Homework more, due to her daughter struggling with Homework.
- Molina loves the program, loves the creativity and can't wait for next year, to do more exercising like she does in RR.

Manse Parent- Janette

- · Has a kinder student, also is SAFE staff
- Would like to see more sports worked in to SAFE
- Jeff--- said he would look into the structure and maybe find teachers to do a club or work sports in our physical activities.

JG- Shamika

Loves the communication, the creativity, and has 2 kids in the program

10. State Requirements

Wanted 431 students but only reached 309 students due to covid.

11. Students Performance

- Winter Mapp Scores to help gear towards students who need the homework help.
- Bubble kids? Students below and not meeting standards.
- · With left open space, for other students to join.
- Pam(Floyd)-- wants to know about cutting down students per grade.
- Jeff--- 12 to 13 students, possibly 15 per grade.
- Lori(Floyd)-- feels that if we only focus on academics then we might miss the kids at home who don't get the support they need, from the SAFE program (troubled kids).

Meeting ID: 554 854 9889 Passcode: SAFE2020

- Liz Ewing-- wants to see us break kids down into groups, not grades, with what they need help with and focus on that group as a group and not as a grade.
- Lori(Floyd Principal)-- Brought up IReady and the data they collect on it, and thinks that maybe it will help Jeff with the data.
- Lori(Floyd Principal)—feels we should wait till school opens up and use the
 population of the buildings, take the 3 pieces to help run safe, tutor the bubble
 kids. Want to know what is the SAFE program goal?
- Jeff-- The goal for the SAFE program is to get with the principles and staff at the schools and gear the academics around what the students need.
- Karen(grant writer)-- Personal Opinion is not to focus on just bubble kids and to focus on all the kids that truly need help, and to have open communication with all the staff.

12. Concerns and Challenges

- Pam(Floyd)-- would like to see next year some kind of open house, so we can tell
 the parents what we do and explain rules and our structure in SAFE. She feels
 that parents use us as a babysitter and do not fully understand what we do here
 and why it is important to only have your child in the program if they need help.
- Jeff- Said that it is a great idea, he will go over it and try to make it work for next year, and to maybe be a part of the school's open house, so that way we get to see a lot of students and parents to tell them about the program.
- Jeff-- is also concerned about how many parents use SAFE as a buffer for 15 to 20 mins, and don't keep kids in the program for the full sessions. He wants to change the pick up times to 4:30 and 5:30 to free up the door and only allow students to leave before this time in an emergency, and not sports or other obligations, it takes up a spot for a student who could really need it.
- Jeff- wants to cut down on the playground time between snack and academics, it
 is just to let them work off energy before going into homework mode.

Next meeting should be around September, no specific time or date, due to opening up to 5 days next year.
